WORK EXPERIENCE

Freelancer

April 2022–Present

North York, ON, CA

Worked on various projects with various domains. Keeping track of time spent on different projects, billing clients and delivering projects as per client's expectations.

Software Engineer

Jun 2020 –March 2022

Edifecs Technologies Private Limited • Mohali, Punjab, IN

My current role is to contribute in implementing visual elements that users will see and interact via web browsers, and to provide optimal solutions for problems which occur in day-to-day development of an enterprise level product.

Software Engineer

Sep 2018 - May 2020

ONE Business Consulting Group • Mohali, Punjab, IN

As a full developer I was handed the responsibility to overall plan and develop robust web and mobile applications including RESTful APIs for these applications. Understanding and managing client interactions and requirements was also the part of my responsibilities here.

Software Engineer

Sep 2016 - Oct 2018

Igniva Infotech Pvt. Ltd. • Mohali, Punjab, IN

As a full stack developer, I managed to handle both front and back-end coding. Designing user interactions on websites, developing servers with NodeJs, and databases for website functionality were part of my responsibilities here.

Asst. Software Engineer

Jul 2015 - Jun 2016

Purple Intellect • Mohali, Punjab, IN

I was assigned the role to understand the ongoing project and provide support to senior developers while working on an optimization or eradicating defects. Understanding and implementing latest technologies was also part of my responsibilities here.

EDUCATION

Project Management Graduate Certificate

May 2022-Dec 2022

Georgian College • Toronto, ON, CA

Ongoing

Bachelor of Technology in Computer Science

Aug 2011 - Jun 2015

Punjab Technical University • Punjab, IN

Percentage: 71%

AWARDS AND HONOURS

Spot Award

2021

Presented by Engineering Manager at Edifecs Technologies. He quoted "Inderjit has single-handedly built,

implemented and supported the Risk Analytics Web UI. This includes working closely cross team with shared UI components and the AccountService. His efforts are directly contributing to our upcoming beta release of RiskAnalytics. I am excited to continue working with you and look forward to see where things take us.”

Spot Award

2020

Presented by Manager at Edifecs Technologies. He quoted “Since joining Edifecs in June, you have taken over the entire UI for Smart Decisions, improved the code and quality, identified and resolved numerous issues and have jumped into new area’s that you have had no experience with enthusiasm and energy. Ramping up and being able to contribute to the product as quickly as you have is proof of your motivation and capabilities. It has been a pleasure to have you at Edifecs and to work with you.”

Best Team Project Award

2018

Presented by COO of Igniva Infotech.
